

Summer Math and Science

Brockton Public Schools would like to offer families of students in Grades K-5 some suggested activities to practice math through the summer months. Due to this unprecedented time, we acknowledge that students and families will need time to rest and recoup from all the remote learning students have been participating in. At the same time, we also know that remote learning does not adequately replace a teacher's instruction. It will be more important than ever for students to remain engaged in some educational activities over the summer in order to be ready for the upcoming school year. We are suggesting students participate in some of the fun math activities we are providing for 1-2 hours per week throughout the summer.

ST Math- please log onto ST Math 60 minutes weekly ([via Clever](#))

Games: Please check out the games on the BPS website for your grade level to practice all sorts of skills!
